## **DETAILED ACTION**

### ***Response to Amendment***

1. Examiner disagrees with Applicant's summary of the Interview of October 15, 2010 (file wrapper date October 19, 2010). Examiner asserts that there was never agreement as to the patentability of the amended independent claim 16. Instead, Examiner only agreed that the proposed amendment would define over the Yost reference.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 25 and 26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 25 depends from cancelled claim 1. For purposes of examination, it is assumed to depend from claim 16. Claim 26 depends from claim 25.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 16-18, 24, 27 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Granat et al. US 4,732,289.

Regarding claim 16, Granat '289 Figure 3 teaches a receptacle (122), annular shoulder (144) and a lid having an annular web (unlabeled, read to be the uppermost projection above 118), annular flange (134), resilient hinge (135), a first gas seal (between the web and the upper neck as these are in flush contact), a second gas seal (between the free end of the flange and shoulder 144) and a third gas seal

(126). Examiner notes Figure 1 shows that the flange (34) is formed downwardly. The skirt is at the very least in circumferential tension as it is tightly applied, which would also cause the web to be deformed by the upper edge of the container neck, since these two are in contact with each other.

Regarding claim 17, the hinge is tearable since it is formed of plastic and is thin relative to the flange and the skirt.

Regarding claim 18, the closure is capable of being snapped on, since it is formed of plastic. The limitation is a product-by-process limitation, and thus only the final product (i.e. a closure applied to a container neck) is required by the prior art, absent further claiming the structures and their function which cause the snap-fit to occur. It has been held that method limitations in a product claim do not serve to patentably distinguish the claimed product from the prior art. See *In re Thorpe*, 777 F.2d 695, 227 USPQ 964 (Fed. Cir. 1985). Thus, even though a product-by-process claim is limited and defined by a process, determination of patentability is based on the product itself. Accordingly, if the product in a product-by-process claim is the same or obvious from a product of the prior art, the claim is unpatentable even though the prior art product was made by a different process. *Thorpe*, 777 F.2d at 697, 227 USPQ at 966; *In re Marosi*, 710 F.2d 799, 218 USPQ 289 (Fed. Cir. 1983).

Regarding claim 24, the flange has to be deflected by lateral contact with at least the shoulder (144) since the shoulder has a larger radial extent.

Regarding claims 27 and 28, the flange clearly has a larger distal end than proximal end, as shown in Figure 3, and in figure 1.

### ***Allowable Subject Matter***

6. Claims 19-23, 25 and 26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3781

***Response to Arguments***

7. Applicant's arguments with respect to claims 16-28 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
